About us

SIFANET SYSTEMS is a professional security and technology solutions company specializing in integrated protection, power backup, and system assembly services. We deliver smart, reliable, and scalable solutions for residential, commercial, and institutional clients.

Our expertise combines modern security technologies with dependable power systems and trained personnel to ensure safety, continuity, and peace of mind for our clients.

Vision

Mission

To be a leading and trusted provider of intelligent security and power solutions, recognized for innovation, reliability, and professional excellence.

To deliver high-quality security systems, power backup solutions, and professional guarding services using modern technology and best industry practices, while prioritizing safety, reliability, and customer satisfaction.

Our History.

Established in 2025, SIFANET SYSTEMS was established to address the growing need for integrated security and power solutions in a rapidly evolving technological environment. Since inception, we have focused on providing dependable systems, expert installation, and responsive support tailored to each client's needs.

OUR SERVICES

1. SMART LOCK SYSTEMS

We provide Smart Lock solutions for homes, businesses, and office environments, designed to enhance security while offering convenience and control. Our systems include biometric, PIN, card, and mobile-enabled locks that eliminate the risks associated with traditional keys.

These solutions allow property owners to manage access rights, track entry logs, and restrict unauthorized access in real time. Smart locks are ideal for residential buildings, offices, rental properties, and institutions seeking modern access control. Our installations are secure, reliable, and easily integrated with other security systems.

OUR SERVICES

2. ELECTRIC FENCING SYSTEMS

We deliver professional electric fencing solutions for residential, commercial, and industrial properties, providing a strong first line of perimeter defense. Our systems use controlled electric pulses to create both a physical and psychological deterrent against intrusion.

Designed for durability and safety, each installation includes proper earthing, high-tensile wires, quality insulators, and reliable energizers. Electric fences can be integrated with alarms and monitoring systems for real-time alerts. This ensures continuous perimeter protection and peace of mind for property owners.

OUR SERVICES

3. CCTV SURVEILLANCE SYSTEMS

We provide CCTV installation services that offer round-the-clock surveillance for homes, offices, and commercial premises. Our systems feature high-definition cameras with night vision, motion detection, and remote viewing capabilities via mobile or desktop devices

Cameras are strategically placed to cover critical areas and eliminate blind spots. CCTV systems help deter theft, vandalism, and unauthorized access while providing recorded evidence when needed. All installations are professionally configured, tested, and integrated with other security solutions.

OUR SERVICES

4. STORAGE SAFES

We supply and install secure storage safes designed to protect valuables, sensitive documents, and critical assets. Our safes are built with durable materials and advanced locking mechanisms to resist tampering and forced entry.

Suitable for homes, offices, hotels, and commercial environments, these solutions provide an added layer of asset protection. Storage safes help reduce the risk of loss due to theft or unauthorized access. Each solution is selected and installed based on the client's security requirements.

OUR SERVICES

5. SECURITY GUARD SERVICES

We provide professional security guard services to safeguard residential, commercial, and institutional properties. Our guards are trained in access control, patrol duties, incident response, and customer interaction. They work in coordination with installed security systems such as CCTV, alarms, and access control to ensure complete protection.

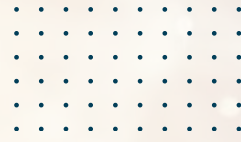

Physical guarding adds a human layer of security that enhances deterrence and rapid response. Our services are reliable, disciplined, and tailored to each client's environment.

OUR SERVICES

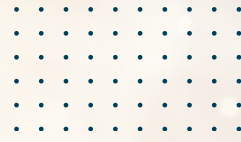

6. SOLAR & POWER BACKUP SOLUTIONS

We offer solar and power backup solutions to ensure uninterrupted operation of security systems and essential services. Our solutions include solar panels, inverters, batteries, and backup systems designed for efficiency and reliability.

These systems protect clients from power outages, ensuring continuous surveillance, access control, and alarm functionality. Ideal for homes, offices, and critical facilities, our power solutions reduce downtime and operational risk. Each installation is customized to meet specific energy and load requirements.

OUR SERVICES

7. SYSTEM & MACHINE ASSEMBLY

We provide system and machine assembly services tailored to specialized operational and technical needs. Our team assembles, integrates, and configures hardware systems to ensure optimal performance and compatibility.

This includes security systems, power setups, and custom technical assemblies for commercial and industrial use. Every system is carefully tested to meet functional and safety standards. Our approach ensures reliable operation, efficiency, and long-term durability.
